Assisting low-income customers for nearly a decade

NEW JERSEY
AMERICAN WATER

Assisting customers who need it most

For more than eight years, New Jersey American Water has been assisting low-income customers who qualify through its H2O Help to Others Program™ and Low Income Payment Program (LIPP).

H2O Help to Others Program™

Our **H2O Help to Others Program™** provides aid to those who need it most. Customers who qualify may receive a grant of up to \$500 to help pay their water bill. A grant from this program may not cover a recipient's entire water bill. In some cases, recipients must pay a portion of their bill based on their income. In 2008, the company provided more than \$175,000 in assistance grants to 669 households. The program's grant monies are funded through a corporate match (up to a total of \$25,000) of customer and employee donations.

Low Income Payment Program (LIPP)

The **Low Income Payment Program (LIPP)** takes the H2O Program one step further by providing aid to New Jersey American Water's most economically challenged customers. This aid can be equivalent to as much as 20 percent of a customer's monthly bill, depending on eligibility.

Eligibility Guidelines

To qualify for the H2O and LIPP programs, customers must have annual incomes at or below 200 percent of the Federal Poverty guidelines for the H2O program and 175 percent for LIPP program, as provided in the chart below. For additional qualification requirements, customers can contact New Jersey SHARES, New Jersey American Water's program administrator.

Lower your water bill by using water wisely

In addition to our two low-income programs, we educate customers on the importance of using water wisely to reduce their water bill by following these simple tips:

- Take a shower instead of a bath. It can save 40 - 55 gallons of water.
- Install water-saving showerheads and shorten your shower time to five minutes.
- Turn off the water while you are brushing your teeth.
- Rinse produce in a basin as opposed to running water.
- Run only full loads in your dishwasher and washing machine.
- Check your toilets for leaks – a leaky toilet can waste up to 100 gallons of water every day!
- Use a broom instead of a hose to clean patios and sidewalks.
- Water your lawn and plants only when they need it and make sure sprinklers are off when it rains. Watering after dark reduces the amount of water you need to achieve the same results as watering during the day.
- Use a hose nozzle on your hose to better control the flow.
- Don't leave the water running while washing your car. Using a spray nozzle and a bucket will help to use less water.
- Plant appropriately for your local climate. Choose plants that are drought-tolerant. Your local nursery can help.
